

HSK 1–3 Starter Workbook

Every word of the first three HSK levels, with somewhere to write them

ThePureLanguage
thepurelanguage.com/downloads

All 601 words of HSK 1, 2 and 3 — the whole of what an HSK 3 candidate is expected to know — as a list to work down, a test to sit later, and characters to write.

- Work down a list and tick what you already knew. What is left is your actual course, and it is almost always shorter than it looks.
- Cover the pinyin column with a ruler and read down the characters aloud. HSK 3 is the level at which the real exam paper stops printing pinyin for you, so this is the drill that matters.
- Use the self-test pages a week later, not the same day. If you can write the meaning in from memory the word is yours; if you cannot, it was recognition, not recall.

Built from the HSK word lists at thepurelanguage.com/hsk, and updated when that page is.

English definitions are from ThePureLanguage's own dictionary, except those marked †, which are adapted from CC-CEDICT (cc-cedict.org), published by MDBG and its contributors, based on CEDICT © 1997, 1998 Paul Andrew Denisowski, and licensed CC BY-SA 4.0 (creativecommons.org/licenses/by-sa/4.0). Word list follows the official HSK syllabus.
